B Lab

Jr Web Application Developer Take-home

Task:
- Choose any API (i.e. Netflix, Spotify, Foursquare, Twitter, weather related, etc)
- Write a simple web application that consumes data from more than 1 endpoint of the chosen API
- Present the data and provide basic interaction capabilities

Examples:
- Ability to search for weather results by zipcode
- Display most popular movies via Netflix by state
- Search restaurant listings in Philadelphia, filter by popularity

Bonus Points
- Use Ember and/or Laravel
- Code is publicly accessible on GitHub
- Test coverage
